How to clear cache and cookies when using Google Chrome on Windows

To clear cache and cookies when using Google Chrome on Windows, follow the steps detailed below:

• Click on the More button, situated in the upper right corner.

• Go to History, and select History.

• Click on the Clear browsing data, in the left-side column.
• Choose **From the beginning of time** and click again on **Clear browsing data**.

**NOTE**: Make sure the boxes next to **Cached images and files** and **Cookies and other site and plug-in data** are checked.
